There are always shades of dichotomies

Are dichotomies so numerous because of our hemispheric brain?

We might as well

That's heavy.

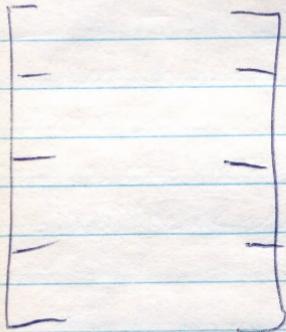

My book might be  
entitled "Statements"  
(with explanations)  
e.g. Wittgenstein  
Statements may be  
ordered in many ways.  
some truthful, some not so.  
But there isn't any  
"proper" way. Each  
statement is related  
to all the others.

Why are so many  
words capitalized in  
German?

I like the form of  
numbered statements.
